

## MT167 – MACROFAN UHS SPEEDY ACCELERATOR

Ready for use

---

### DESCRIPTION

Accelerator for 2K UHS refinish field.

---

### USE

Suitable to speed up the drying process of 2K UHS finishes when faster drying at low temperatures is required or the painting process has to be accelerated (e.g. touch-ups or partial painting at lower temperatures than 30°C).

---

### CHARACTERISTICS

- Drying speed increase
- Earlier polishing time
- Unaltered aesthetical aspect of the finish

---

### APPLICATION

Add up to **5%** according to type of product (for the right percentage we recommend you to consult the technical data sheet for each product).

The additive addition replaces the thinner.

---

### NOTES

The addition of MT167 considerably modifies the products' pot life: it is, therefore, recommended to apply the product just after this addition.

Higher additions than indicated can damage the final aesthetical aspect and the films resistance over time: we recommend, therefore, to take great care in the addition of this product and to never exceed the recommended quantities indicated in the relevant technical data sheets.
